IN SITU

Place-based **innovation** of **cultural and creative** industries in **non-urban** areas

IN SITU was a four-year project that combined research and experimental actions to advance the innovation-related practices, capabilities and potential of cultural and creative industries (CCIs) based in non-urban areas of the European Countries.

CCIs provide a pro-active, future-focused approach to rural community resilience by supporting individual and collective identity and belonging, continuous learning, entertainment and enjoyment, and tourism, economic diversification and regeneration.

Key concerns hindering development are very similar to obstacles Northern Ontario's CCIs experience. They include limited recognition, support, access to training, networking opportunities, gender disparities and data constraints.

Dr. Jude Ortiz, of NORDIK Institute served as an International Advisor, participating in round table discussions, reviewing reports and presenting at conferences.
