DATA NORTH

Explore Northern Ontario community data

A platform for discovering, understanding, and using community data.

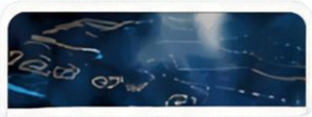

Why DATA NORTH?

Reliable local data is essential for understanding community needs, identifying service gaps, and supporting informed decisions. DATA NORTH brings together socio-economic, health, housing, and environmental indicators in one accessible platform to support evidence-based planning, research, and community development across Northern Ontario.

The platform

💻 **Explan the Data**

Filler and selectors across communities. Data download links in dashboard.
